If you could have them forward those to Matt, that would be great.

Sorry for the delay in responding. The height is 41' above existing cap grade and covers approximately 27 acres. The slopes are 4 to 1 on the sides with top slopes ranging from 6 to 1 down to 10 to 1. We do have CAD files with the proposed contours for the new cap in addition to the existing grade. If that is what you need, I will talk to our CAD tech and forward.

Thank you,

Beth Rohde, PE

Thanks, Michael.

Beth, I'm looking for a plan view map of the new Alt 2D (similar to the attached but for the new version).

I need to be able to identify:

- Cap foot print (acres)
- Anticipated cap height
- Side slopes (% grade and any differences between sides of consolidation area)

If it's too early for this level of detail, let me know and we will work from what Jeff provided.

Thank you.

Matt

Beth,

Do you have something in CAD or a bit more detailed than the PDF? Thanks.

Matt,

If there is a specific format that you need, let Beth know. She will send it along if they have it.

Michael
